Data Science with

Web Applications & the "Shinyverse"

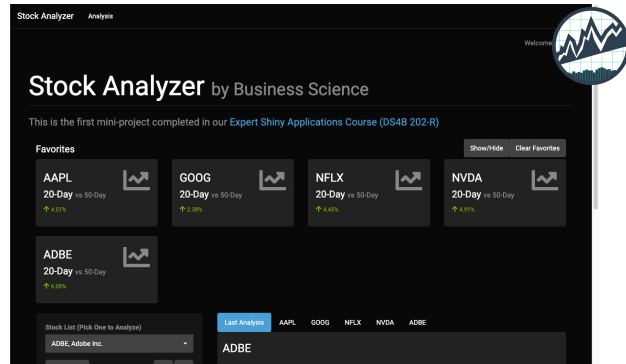

Flexdashboard Apps

Flexdashboard is an [RMarkdown-based](#) dashboard tool that can be used to integrate shiny components at runtime. Development is fast and efficient, but layouts are not as open to modification as building an app using Shiny.

Shiny Apps

Shiny is an R-Package that enables [web app development](#) from R. Contains R functions for common HTML structures, UI Controls (Components/Widgets), and web framework tools. The framework is highly flexible, but users require more knowledge of HTML & CSS.
